ETYMOLOGY

L. *vectis* — lever; the
instrument that multiplies force.

02 // MANIFESTO

Voice — Editorial register

*Leverage isn't loud.
It compounds quietly—
until it's the only thing in
the room.*

Vectis builds the systems that turn taste, time,
and capability into compound advantage. We
work with founders who already know what
good looks like — and want to move faster than
their competitors can copy.

03 // OPERATIONAL TEMPO

Core organizing system — T₀ → T₃

T₀ IDLE

System at rest. Inputs heard, nothing
committed.

T₁ ALIGN

Direction chosen. Constraints set.
Velocity zero.

T₂ ACCELERATE

Compounding begins. Each cycle
outpaces the last.

T₃ COMPOUND

Outputs become inputs. The advantage
is structural.

06 // OPERATING PRINCIPLES

How we decide

01 Compounding beats clever.

We choose the move that pays again next quarter over the one that
wins this week. Brand, systems, and AI are infrastructure — they
must be built to endure.

02 Constraints before composition.

No design starts on a blank page. We define what the work must do,
what it must not, and who it must convince — then make it
inevitable.

OPERATING PRINCIPLES

01 Compounding beats clever.

We choose the move that pays again next quarter over the one that wins this week. Brand, systems, and AI are infrastructure — they must be built to accrue.

02 Constraints before composition.

No design starts on a blank page. We define what the work must do, what it must not, and who it must convince — then make it inevitable.

// VECTIS / EST. 2026

Leverage isn't loud.
It compounds
quietly.

We build brand, AI, and operational systems for founder-led companies between \$3M and \$15M. Six-week engagements. Outcomes that accrue.

BEGIN ENGAGEMENT →

READ THE METHOD

// CURRENT TEMPO

T ₀	IDLE	Open · 2 slots Q3	•
T ₁	ALIGN	Kestrel & Co.	•
T ₂	ACCEL	Holloway Foods	•
T ₃	COMP	Marrow / Ongoing	•

NEXT INTAKE - Q3 2026
• 2 slots open

// T₂ — ACCELERATE

Each customer touch should make the next one easier.

Today, Kestrel's onboarding loses 38% of accounts before week two — and that data goes nowhere. A compounding system would route each loss back into the next cohort's intake.

ENGAGEMENT PROPOSAL · CONFIDENTIAL
DOCUMENT REV 2.0 · ISSUED 05.01.26

// FOR KESTREL & CO.

A compounding system for the next thousand customers.

A six-week engagement covering brand alignment, AI-assisted onboarding, and the operational scaffolding that turns each cohort into intelligence for the next.

PRINCIPAL

FEE
FIXED · SCHEDULE A

DURATION
6 WEEKS · T₀ → T₁

RECIPIENT
A. RAMIREZ, CEO

// SCOPE OF ENGAGEMENT

A six-week program to align brand, AI infrastructure, and customer operations into a single compounding system.

Ana —

Following our session on the 28th, this letter confirms the engagement scope. The objective is unchanged: turn Kestrel's three customer touchpoints — discovery, onboarding, and quarterly review — into a system that improves with use rather than degrades.

The work is structured against four operational states:

- | | |
|----------------------|---|
| T ₀ IDLE | Audit. Inputs heard, nothing committed. |
| T ₁ ALIGN | Direction set. Constraints documented. |
| T ₂ ACCEL | Build, ship, instrument. |
| T ₃ COMP | Outputs feed the next cycle. |

Deliverables, dates, and the fee schedule are attached as Appendix A. Countersignature on page 4 closes the engagement.

With care,

Marcus Vale
